Cleaning your Caesarstone® Surface

General Day to Day Cleaning

Nothing could be easier. Caesarstone® requires very little maintenance to keep the surface looking like new. For everyday, routine cleaning of Caesarstone® we recommend wiping the surface with warm soapy water (a mild detergent) or alternatively use a quality spray and wipe type cleaner. (Ajax Spray & wipe) Green bottle with Yellow sticker saying – **Ideal for stone**

Extra stubborn dried spills and stains

For removal of these or if you wish to give your Caesarstone® benchtop or surface a thorough clean then we recommend **Caesarstone® brand Cream Cleanser** and the **3M™ Scotchbrite™ Never Scratch™ All-Purpose Scrubber**.

- Wet benchtop and **3M™ Scotchbrite™ Never Scratch™ All-Purpose Scrubber**
- Squeeze a generous amount of Caesarstone® brand Cream Cleanser onto the wet Benchtop.
- Use the **3M™ Scotchbrite™ Never Scratch™ All-Purpose Scrubber** in a circular motion, avoid prolong rubbing in one spot. Wipe clean and rinse with water.
- To remove adhered materials like food, gum and nail polish, first scraped away the excess with a sharp blade.
- If there are any grey metal marks on the surface, a mild detergent, or the **Caesarstone® Brand Cream Cleanser** will remove it.
- **Household bleach** can be used as an effective cleaner to remove stubborn marks and hygiene cleaning, **1 part bleach to 1 part water. 1 part Cream Cleaner**. Care should be taken as some products are considerably stronger than others.
- **Always dry off with a clean cloth so as to stop airborne dust from settling back on to the damp surface. This is what sits in the valley's within in surface and gives you the appearance of staining or marking**

CaesarStone® brand Cream Cleanser & 3M™ Scotchbrite™ Never Scratch™ can be purchased from our website:
